

1057 Foamtech

Description

Cement-based thermal insulation board adhesive.

Fields of Application

- Interior and exterior walls of all buildings; adhesion of XPS, EPS and Stone Wool thermal insulation boards.

Properties

- Specially designed for thermal insulation systems and offers high adhesion strength.
- Easy-to-apply.
- Extended open time.

Preparation of Substrates

- Substrates must be sound, free from oil, grease, and sufficiently dry. Remove any residue which may prevent adhesion
- Cracked plasters mortar and cement residues must be scraped off the surface.
- Use Tamirart in case of uneven substrates to get a sound and flat surface.

Application

- Pour Foamtech on the amount of clean water specified in the technical table slowly and mix to obtain a homogeneous paste free from lumps. Allow the mortar to stand for 5-10 minutes to mature and remix it before the application.
- If there are level differences on the surface, apply mortar to the whole back-side edges of the board, apply in dots at the middle section and press to the wall.
- If the surface is even, you can apply adhesive mortar by raking method.
- Check the level of boards with a float or a water gauge.

1057 Foamtech

Post-Application Protection & Suggestions

- Consume the prepared mortar within 3 hours.
- Fix mechanically after 24 hours at minimum depending on the environment temperature and surface properties.
- Should be used within shelf life. If shelf life has expired, it should not be used during application.
- The consumption values in the table refers to an average consumption amount. It may vary depending on the application conditions and surface properties.
- Since it contains cement, it irritates the eyes, respiratory system and skin. For further information refer to the safety data sheet.

Storage

- Packages should be kept dry and cool at between +5°C and +35°C in moisture free conditions. Avoid direct sunlight.
- Packages should be protected from water, frost and adverse weather conditions.
- Do not stack more than 10 bags on top of each other.
- Shelf life is maximum 12 months conditional to complying with the above mentioned conditions.

Packaging

- 25 kg multi-ply paper bags.

Certificates of Quality

TS 13566 / June 2013

**Technical Specifications**

(23 °C and 50% RH)

General Data

Colour	Grey powder
Shelf Life	12 months in the original sealed packaging in dry place.
Application Tools	Notched trowel, trowel

Application Data

Application Temperature Range	(+5°C)-(+35°C)
Pot Life	3 hours
Mixing Ratio	5.5 - 6 lt water / 25 kg powder
Consumption	4-5 kg/m ²

Performance Data

Adhesion to the Thermal Insulation Board	Min. 0.08 N/mm ²
Water Absorption	30 dk. max. 5 gr / 240 dk. max. 10 gr
Flexural Strength (EN 1015-11)	Min. 2 N/mm ²
Compressive Strength (EN 1015-11)	Min. 6 N/mm ²
Adhesive Strength of Hardened Rendering and Plastering Mortars (EN 1015-12)	Min. 0.5 N/mm ²
